nanio series

The nanio series of diode-pumped solid-state lasers is designed to perfectly fit today's requirements for industrial laser processing systems. The sealed cavity, modular design, fully detachable umbilicals and industrial grade connectors make this laser a rugged tool with exceptional performance and reliability.

Besides customer needs, reliability was the main driving force during the development of the nanio series. Our clean room production and the use of highest quality components ensures consistent quality and longest laser lifetime.

Applications

- * Stereo Lithography
- * Marking (Silicone, PCB, IC, ...)
- * Sapphire Scribing
- * Touch Panel Manufacturing
- * Micormachining

Features

- Superiour pulse-to-pulse stability
- * High peak power and short pulse width
- * Modular industrial design
- * Easy integration and service
- * Field proven long life pump diode modules

The modular design of the nanio series lasers simplifies servicing and minimizes downtime. Every field replaceable component can be exchanged within minutes without dismounting the laser head. So the beam path in your machine remains aligned.
